1. Introduction

This Workbook contains parts of the Risk Management Toolkit for Micro Finance Institutions ("MFIs"). It was composed for the purpose of a 3-Day Seminar for Risk Management. The Analyst working with this Toolkit is recommended to use this Workbook in the context of this seminar. While it strives to give a full insight into Risk Management, it might not be sufficient for a Risk Management implementation in an MFI.

2. Questionnaire

The Questionnaire was developed by several teams in the IFC. It can serve various purposes. For the Risk Assessment to be conducted at the institution, the Questionnaire serves to give first overview of the institutions situation. The answers to the questions will give the Analyst an idea with regards to the level of qualification and sophistication that the Analyst will face when conducting the project on site. Depending on the scope of the overall project, the Analyst might decide to send the complete questionnaire or to exclude some areas. The questionnaire should be sent together with the Day 1 letter. It is probably a good idea to follow up with a phone call with the contact person in order to make sure that there are no open questions.

Chapters

- General Information
- Products
- General Risk Management
- Credit Risk Management
- Market Risk Management
- NPL-Problem Loans
- HR & IT Systems & MIS
- Governance & Corporte Culture
- Financial Crisis Response

General Risk Management

1 Purpose of the Risk Management Assessment					
	The IFC is conducting an Assessment of the Risk Management in your MFI. According to your opinion, what should be the focus of the Assessment (Please rank the answers from 1 - x, with 1 being the most important factor)				
	Urgent assessment of issues in the area of Credit Risk. The MF		I's PaR increased and you v	vant to find and stop the reasons for it	
	We realize that Credit Risk is an important category and we ha		ave never fully looked at Cr	redit Portfolio Risk	
	In preparation of becom	ming a regulated MFI, we	need a concis	e Risk Management strate	gy across all categories
	In the course of the Glo	obal Financial Crisis we fe	ar the pressu	e on Liquidity Risk and Ma	rket Risk and need support
	We believe that our po	licies and guidelines nee	d an overhaul		
	Other				
	Other				
				ortance of each Category (well prepared, 3 = not prep	1=very important - 5=not important) and how well ared)
Importance	e Preparedn	ness		Comment	
		Credit Risk			
		Liquidity Risk			
		Market Risk (Intere	est Rate)		
		Market Risk (FX)			
		Operational Risk			
		Other, please spec	cify		
	of the Risk Management F			d 0482

3. Workbook

This Workbook contains several Checklists and Interview Guides with the necessary explanations. The Analyst can use them during his interviews and during his analysis as a support in order to ensure that all important aspects are discussed and covered.

Aspects to consider when conducting interviews

Before starting the on-site interviews, define the best strategy to extract the most information from that phase. Some psychological aspects need to be considered to improve the potential for success. In many cases the Analyst is not necessarily interested in the exact answers to the questions, rather than the qualification of the person to be interviewed.

It is recommended to ask open ended questions. In this way the interviewed person needs to structure an answer and not just give buzzwords. It is very important to discover, whether the interviewed person really understands the topic he is talking about or whether he uses prepared answer. Therefore it's also important to ask a follow-up question if the first explanation is not 100% clear or sounds incomplete. Timing of the interviews is of course important as well. In general interviews should not be longer than 60 to 75 minutes. This ensures that the interviewed person stays focused and does not get distracted from the ongoing business. As a matter of courtesy, the Analyst should not extend the interviews without coordinating as this could create unnecessary confusion in the MFI. If the time is clearly not sufficient to finish within the allocated time the Analyst should rather schedule a second interview with the person.

It is recommended to schedule interviews in slots of 90 minutes so that there is sufficient time to either extends slightly or time to review and recap the answers and prepare for the next interview. The Analyst may want to use the structures Checklists and Interview Guides to make notes during the meeting. The Toolkit also provides structured summary sheets which allow the Analyst tool summarize his impressions in a manner that can be used for the final report.

4. Checklists and Interview Guides

Checklist - Economic Conditions

Criteria	Comment
Identify the general economic conditions of the	
Country/Region the MFI is operating in. This includes size	
and basis of the local, regional, and/or national economy relevant to the MFI's operations. Analyze the relevant	
economy's diversification, volatility, strengths/	
vulnerabilities, and growth prospects.	
, , , , , ,	
To collect some of this information you might have to turn to	
local expertise (other MFIs, regional organizations), as such	
data might not be readily available from traditional sources.	
Identify the specific risk and interdependencies. How does	
the local economy connect to the national/regional	
developments? What influence do these developments have	
on the MFI's business? Typical examples are remittances or the fact that the country is a supplier of low cost production.	
the fact that the country is a supplier of low cost production.	
Analyze whether the MFI sector in the country is considered	
more cyclical or countercyclical. Frequently, the assumption	
was that the microfinance sector's performance may be less cyclical and occasionally even countercyclical. This could be	
relevant for MFIs with strong exposure in otherwise	
isolated/independent economic regions. However the recent	
global crisis showed that MFIs in general are closer tied to	
external influences than expected.	
Analyze the country's/MFI's dependence on remittance	
payments. If the share is high – analyze also the economic	
conditions in the economy that is the source of remittance	
payments.	
What is the size and development of the target population?	
How many clients are there currently? Understand the	
population pyramid and the factors that might influence	
mortality. Life expectancy is another aspect to analyze.	
To what degree can external climatic or other factors	
influence the local economy? Also find out how frequent	
1 =	
What were the reasons for part exists? Why did NE eligible	
learned?	
such external effects occur (eg. "EL Nino"). Is there a countermove to external factors (e.g. a drought following a flooding?). What were the reasons for past crisis? Why did MF clients have problems in the past? Can there be any lessons	

How supportive is the government of poverty alleviation and how effective are the potential measures? Some measures might actually be counterproductive for the microfinance sector (subsidies or capped interest rates for loans)	
Are there state owned/state influenced MF organizations competing with the other MFIs? Comment on the effectiveness of those borrowers.	
What information could serve as an Early Warning Indicator for the MFI's business? See also recommendations about Early Warning Indicators in the "Solutions Manual".	

Checklist - Legal Framework

Criteria	Comment
Analyze the legal, regulatory, and supervisory framework of	
the country related to microfinance services.	
Find the laws and regulations beforehand through the	
respective websites.	
Also ask the MFI for the documents.	
Is the current government supportive/neutral/opposed to	
Microfinance? The classic example of negative governmental	
influence is Nicaragua's "no pago" move. You can find this	
out through reading the most recent legal initiatives, but also from interviews.	
non interviews.	
Understand whether the MFI to be analyzed falls under a	
specific regulation (eg. as a credit cooperative) and whether,	
as a consequence of that there are different regulatory conditions.	
Explain the legal framework related to capital requirements.	
To what degree does the country's law reflect criteria from	
Basel 1 or 2? Is the level of sophistication related to the legal	
framework appropriate?	
What are the legal requirements regarding Risk	
Management?	
What are the legal requirements regarding Risk Reporting?	
Estimate to what degree the official reporting requirements	
fulfill the MFI's needs related to proper Risk Management. From this you can derive whether you need to build up	
regulatory reporting as an integrated or parallel process.	
20 ,	
Do the regulatory bodies understand microfinance? How	
does this specific level of understanding reflect on the task of	
supervising Microfinance?	
Are there specific laws for consumer/MF client protection?	
What are the consequences of those rules for the MFI's	
lending methodology? Example: how difficult is the access to	
the borrower's collateral in case of a default?	
Is there a legal limit ("ceiling") on interest rates? If so, how	
high is it and how do MFIs manage to do business under this legal requirement?	
legarrequirements	
Are there any legal restrictions based on faith-based rulings?	
2 and indian pasca off faith pasca failings;	ı

(Example: Sharia based lending) How do MFIs manage to do business under these circumstances?	
Does the concept of titled land existing? Is this relevant also for the land of the MFI's clients?	
Is there a Credit Bureau or a similar organization? If so, how is it used? Is it efficient?	
Is there a "Deposit Insurance system". If yes, how does it operate, is it relevant? Has it been tested?	

Checklist - Analysis of the Competition

Criteria	Comment
Analyze general importance of organized financial services in the country (is the economy largely cash or barter based /existence of current accounts and domestic transfer payments, credit and debit cards).	
Analyze the basic structure of financial service providers in a country. Find out the importance of the various players: banks, other regulated FIs, non-regulated FIs, loan-providers, related service providers (mobile phones providers, etc).	
Analyze the importance of MFI providers in the country or region of the country in which this MFI operates: # of institutions and market share. If data available, categorize the MFIs according to size, structure, products, etc so that you can close analyze the competitive set.	
Compare the financial results of the MFI compared to others. How competitive is the MFI, related to the other institutions? Analyze key indicators related to efficiency, risk, etc.	
Estimate the importance of microfinance/banking services by non-regulated institutions in the specific target region.	
Estimate the potential size of the microfinance market compared with the actual size; the overall level of competitiveness in the market, including from non-MFIs. How many clients are currently targeted? If data is available, split the analysis per region.	
Compare the GDP growth with the growth of the MFI sector. Try to find answers to the question whether the target market is considered to be under/well/over banked.	
How competitive is the MF market in general and in the region our MFI operates? Challenges of heightened competition are: declining interest rate margins, potential pressure on underwriting standards, and generally higher visibility of the microfinance business.	
Who are the specific competitors of the MFI in each region? Differentiate between non-regulated MFIs, regulated MFIs, FIs, non-banks, etc. Depending on the availability of data, a more detailed analysis can be conducted	

What is the general perception of microfinance services in a country: do borrowers wish to be associated with MFIs or would they prefer to graduate to a banking relationship? What is the influence of the gender of the borrowers?	
Analyze the level of sophistication of customers. This relates to the general education levels, literacy, health conditions. From this you can derive the products that can be offered in a market and those which could be too advanced.	
Analyze the levels of over-indebtedness among the population, target clients and clients in general. This might be a difficult task and the answer is most likely to be found through interviews and anecdotal evidence.	
What are the specific strengths of the MFI? Is the MFI differentiating itself from the competition?	
Does the MFI have competitive advantages and to what degree are they utilized to strengthen the MFI's position?	

Checklist - Corporate Governance

Criteria	Commont
Criteria	Comment
Analyze the MFI's ownership structure. Who are the	
investors in the MFI and what are their goals? Rank the	
investors according to their financial sophistication. What	
are the role and influence of NGOs and other nontraditional	
financial institutional investors?	
initialicial institutional investors:	
Do the owners and more importantly, the owner's	
representatives on the Board have the necessary financial	
expertise to enable them to provide value to the MFI? You	
might need to research about the Board members on the	
internet and see how other institutions perform in which	
they are present.	
and the present	
Do the according to the financial reservoir and calls	
Do the owners have the financial resources and willingness	
to support the MFI's strategic plan? This is difficult to	
estimate, but some indications could be drawn from the	
nature of the investor. An NGO organization might not have	
the financial resources to support strong growth, whereas an	
international network organization usually seems better	
prepared to make follow-up investments. Other investors	
like MIVs might have more financial targets and therefore	
defined investment horizons.	
defined investment nonzons.	
How free are the owners to decide about the future strategy	
of the MFI or how much are they influenced by political	
structures?	
What is the long-term strategy of the owners? Are they	
willing and able to provide the necessary capital for potential	
growth strategies? In a perfect situation the Analyst can	
participate in meetings with the Board and discover the	
distribution of power and decision-making among the Board	
members.	
members.	
Management of the second of th	
If new investors have been brought in to support future	
phases of the MFI's growth, do they share the objectives of	
the existing investors?	
Analyze the mission statement of the MFI. Find out to what	
degree it is focused on traditional core MFI values (eg.	
reaching clients with limited access to financial services in a	
sustainable manner) Try to find out to what degree such a	
mission statement is just a "must have" or is actually	
incorporated into the daily life of the MFI.	
What are the specific qualifications of the individual Board	
members? Are the skills and abilities sufficient to lead the	
MFI over the next years?	
· · · · · · · · · · · · · · · · · · ·	•

Do the Board members have any kind of Conflict of Interest either through other mandates or by being lender and owner at the same time?	
Do the Board members have a clear idea about the conflict between social responsibility and profit-making? Occasionally you can find that while in theory this topic seems very clear, Board members have some difficulties to translate that into day-to-day decisions.	
Does the MFI have Code/Guidelines of Corporate Governance that outlines governance practices? What are the procedures for monitoring compliance with this code?	
How active is the Board in steering the MFI towards its goals. The MFI probably relies on the expertise of its Board members to contribute to future growth. But on the other hand, the Board should also leave the management independent in the execution of its tasks.	
Can Board members receive a loan from the MFI? If so, what are the conditions? Are the lone members current on their loan payments? What is the generalization process in case a Board member defaults on the loan?	
How is the MFI protected against the risk of key people leaving the institutions?	
Explain the relationship of the Board to Internal Audit. This is most likely a topic that finds its basis in the legal framework. Still it is important to understand the working relationship between those two bodies!	
Is there an incentive system established for management? If so, based on what targets (profitability, loan growth, portfolio quality or else)? Please explain the incentive system in detail and try to understand how management is following it! Is there potential for arbitrage in the system?	
Does the institution have clearly defined risk strategy? If so does this strategy go beyond qualitative statements towards clear risk tolerance thresholds, exposure limits or similar tools?	

Checklist - External Sources of Risk

Comment

Checklist - Risk Culture

Criteria	Comment
To what degree is a topic of Risk Culture addressed in the organizational aspects of the MFI?	
Describe the explicit measures of Risk Culture as the MFI is applying them. This includes trainings, specific processes that should discover sources of risk. Open exchange of information, etc.	
Find out how the plan to grow and increase revenues relates to the concept of careful Risk Management. Is the management aware that Risk Management has to be an integral part of the MFIs planning? Using the questions in the respective Interview Guides should help discover to what degree the key people have understood the important aspects of Risk Management.	
To what degree does the MFI make a well organized and disciplined impression? How well are larger projects planned and executed? What is the level of capacity utilization (qualitative evaluation is sufficient)?	
Search for a general level about the work atmosphere. Do the employees enjoy working for the MFI? Is there a certain level of frustration discoverable?	

Checklist - Credit Risk

Criteria	Comment
	Comment
Prepare the Questions 1 of the data analysis attached to this Checklist. This should be the minimum data available from the MFI.	
Review the MFI's total credit exposure through breakdowns by geography, collateral, maturity, currency, industry sector, types of products, types of borrowers, and other relevant categories. For each of the categories build a table showing total loan volume (disbursed & outstanding), number of borrowers, number of clients, PAR>30 rate, interest rate. This exercise should help to discover the concentration of problems. If a concentration of a certain problem area becomes obvious, analyze further using the schemes of the Questions 3&4 of the data analysis attached to this Checklist.	
Compare the Provisioning Requirements in the MFI with the required domestic standards for regulated MFIs as well as International Standards like the CAMEL Standards. Use Question 2 of the data analysis attached to this Checklist.	Rescheduled Aging Status
Analyze the provisioning requirements according to domestic regulations and international standards. Compare the existing provisioning to the calculated levels. Use Question 3 of the data analysis attached to this Checklist.	
Provide a simplified Vintage Analysis of the portfolio. Use Question 4 of the data analysis attached to this Checklist. The task is to find out in which month loans usually start to default. For this analysis, the portfolio download of one month-end is fine.	
Provide a complex Vintage Analysis. For that, you need the month end portfolio downloads of several months to see whether there are changes in patterns as to when loans start to default. This analysis allows estimating future provisioning expenses.	
Analyze the history of nonperforming assets (NPAs), loan losses, and provisions. The analysis should go as far back as possible (several years).	
In assessing the true level of problem assets, the Analyst should look beyond the regulatory definitions of problem loans to determine the level of assets on or off the MFI's balance sheet for which the MFI is exposed to a heightened level of credit risk.	
Using external risk factors as discovered in the previous	

checklist, find out to what degree the loan portfolio could be stressed against the change in one of those risk factors. For	
example, assuming that MFI provides foreign currency loans	
to borrowers, what would be the effect of a depreciation of	
the domestic currency on the quantity of the loan portfolio?	
, , , , , , , , , , , , , , , , , , , ,	
Using the information about collateral, develop an approach	
to value the collateral. In a separate checklist we will look at	
<u>'</u>	
the enforceability of collateral. This is not part of this section	
of the Toolkit.	
Select a set of loans to conduct a specific review of the loan	
applications. The goal is to discover how careful the	
borrowers were analyzed. [See separate Checklist to be	
produced]	
Try to draw a comparison between the findings of this MFI	
and other MFIs.	
Analyze the Credit Risk resulting from the investment of	
surplus liquidity. This topic borders with Liquidity Risk.	
In case there is significant currency risk in the clients	
business, for example, clients have foreign currency loans	
but do their business in local currency, produce a sensitivity	
analysis about the effects of currency devaluation on credit	
risk.	
Tion	
	1

Checklist - Market Risk - Interest Rate Risk

Criteria	Comment
Produce a Maturity profile of all assets and liabilities on the MFI's balance sheet. Differentiate between legal maturities and economic maturities and explain the applied rationale for those differentiations.	
Analyze the effects of certain scenarios related to the maturity assumption of client deposits.	
Analyze the gap for the respective maturities; produce a sensitivity analysis about the effects of interest rate changes on the institution's profitability.	
Analyze the availability of risk mitigating instruments. Analyze the providers of risk mitigating instruments in the domestic market.	
What are competing institutes doing to manage and mitigate market risk?	
Using the existing reports of the MFI, analyze the existing interest rate risk as well as the usefulness of such reports.	
Is there a re-pricing risk resulting from savings products?	

Checklist - Liquidity Risk

Criteria	Comment
What is the amount of cash available for the MFI? What is the amount of cash available for each branch?	
What instruments are used for short-term investments? How is the accessibility of to such instruments?	
What is the availability of credit lines for the MFI? To what degree are those credit lines used (currently and on average in the past)? Produce a list of all available credit lines including interest rates and maturities.	
Compare the levels of cash and short-term investments tool the limits as defined in the policies.	
Using the existing reports of the MFI, analyze the existing Liquidity Risk as well as the usefulness of such reports.	
Understand how Liquidity is measured on the institutional level and on the branch level.	
Analyze the short term liquidity profile of the MFI	
What stress tests are done for Liquidity Risk management?	
Does the MFI require compulsory savings? If so, how are compulsory savings handled? Are they fully separated and invested only in allowed products or are they used to fund the loan portfolio?	
Does the MFI offer voluntary savings? Comment on the success related to savings. It may reduce the cost of funds, client satisfaction or markets demand.	

Checklist - Foreign Exchange Risk

Criteria	Comment
Produce a report showing all external funding sources including maturities, interest payment dates in foreign currencies.	
Calculate the effects of foreign exchange rate fluctuations over all maturities and calculate the effects of such fluctuations on the P&L of the MFI.	
Using the existing reports of the MFI, analyze the existing foreign exchange risk as well as the usefulness of such reports.	
Are there any instruments available in the domestic market to manage FX risk?	

Checklist - Funding Risk

	Comment
Criteria	
Produce a report showing all external funding sources including maturities, interest payment dates.	
Stress the maturity profile assuming that replacement funding for maturing external funds is unavailable at maturity.	
Prepare a report on all financial covenants related to external funding!	
Analyzed the loan agreements of every external funding of significance (> USD 250,000). If the MFI has received funds from international investor like an MIV or a social responsible fund or other third parties, ask for the loan documentation and analyze the documentation for hidden risks.	
Using the existing reports of the MFI, analyze the existing Liquidity Risk as well as the usefulness of such reports.	
Compare the cost of various sources of funding. To what degree are voluntary savings reducing the funding costs (excluding operating expenses)?	
Is the institution using compulsory savings to fund the loan portfolio? If so, is this a legal process? If this is not a legal process, what are the consequences of the current process? Are any of those consequences enforced?	

Checklist - General Risk Management Policy

Comment	Observation
Does the policy define or state the overall risk appetite?	
Does the policy clearly define high level responsibilities? Are the instructions clear and current? Occasionally such policies refer to previous organizational structures	
Does the policy foresee the establishment of an independent risk function in the MFI? For small MFIs that might not be relevant but MFIs with loan portfolios above \$50mm or more than 30,000 clients should consider such a function.	
The Risk Management committee approves the limits on global level as well as on a certain level of granularity for the various risk categories.	
The Risk Management committee approves the methodologies to identify, measure, monitor, and manage the various types of risk. The details of that are developed under the responsibility of the risk manager.	
Approve the reports that are submitted to the Board Risk Committee. In this way the Risk Management Committee takes responsibility for the submitted reports.	
Provide a report to the board risk committee about the risk situation as well as the work of the Risk Management committee over the past period.	
When the policy was last reviewed? How often is the policy reviewed? Who has approved the policy	(suggestion: at least1/year)

Credit Risk - Policy and Guidelines

Credit Risk - Policy and Guidennes	
Comment	Observation
Understand how the lending analysis is described in the	
Policy and Guidelines: what are the methodologies to	
evaluate creditworthiness, collateral policy, structure of loan	
repayment schedule.	
If borrowers are from informal sector, expect that there are	
no formal records. Lending methodologies use alternative	
ways to assess borrower repayment capacity.	
Are the guidelines set in a way so that the MFI can learn	
from its experience?	
Understand how the lending decision is made: who are the	
decision-makers. How is the approval process organized?	
How is the approval process documented?	
Thow is the approval process documented:	
If there is a Credit Bureau: how do policy and guidelines	
reflect the use of the Credit Bureau?	
reflect the use of the creat bureau:	
Policy details about collateral – MFIs generally treat	
collateral more as a psychological tool than as a secondary	
source of loan payback. The MFI's collateral policies will	
reflect this assumption: what kind of collateral is accepted?	
Is collateral registered? When is collateral registered (only	
when problems arise or already before)?	
How firm are the repayment schedules? Is there flexibility	
for the borrower to pay at discretion?	
The borrower does not make a payment according to	
schedule. What is the procedure?	
The state of the s	
What is the Policy for renewals and lost size increases 3 451-	
What is the Policy for renewals and loan size increases? MFIs	
sometimes offer automatic or quasi-automatic increases in	
loan amounts if a client repays its loan without delays. What	
is the Policy to ensure that automatic loan increase maintain	
adequate control over the borrower's indebtedness?	
What other policies related to restructuring loans?	
What are the "write-off" policies?	
·	
What are the procedures regarding non-payment of	
interest/principal?	
πιτετελή μπιτειματ:	

How is the handling of problem loans solved in general?	
How restricted are the policies regarding loan purpose?	
What does the policy state about multiple borrowings?	
What are the procedures regarding non-payment of interest/principal?	
What are the requirements to classify the loans as delinquent? Timing and amount?	
Analyze procedures regarding loan disbursement. Given the decentralized structure of MFIs, as well as the fact that disbursements and collections are often cash transactions, the process of disbursing and collecting loans is vulnerable to both human error and fraud. The MFIs must have detailed written procedures governing these transactions.	
How is the process of repayments handled?	
Are there guidelines related to loan portfolio monitoring?	
Is there a loan grading/rating system in place?	
Explain the applied classification scheme and the provisions related to the respective PaR classification. Also explain to what degree this scheme deviates from the domestic regulations as well as from internationally recognized standards.	

Checklist - Lending Process

Comment	Observation
	Objet vation
Client selection and initial marketing: Who provides the access to new clients? How are new clients discovered? New	
clients are frequently found through referrals from existing	
clients or also through "financial advisors" who find clients	
for a fee. You are interested in understanding what level of	
pre-selection is done at that level.	
pre-selection is done at that level.	
Market saturation: What is the nature of new client? Are	
clients already in contact with other MFIs? Are those first	
time clients or are the clients leaving another MFI?	
Depending on the respective country, you might find certain	
saturation with financial services. Even though there might	
be a large share in the population without financial services,	
the existing MFIs all share the same subgroup of clients due	
to proximity or simply for convenience purposes.	
Introduction: How are products of the MFI presented? How	
much do Loan Officers consider the true financing needs of	
clients? What do Loan Officers explain regarding the risks of	
financial products? Here you want to find out to what degree	
financial products are offered because of client's needs or	
more because of sales pressure from the MFI. What are the	
arguments that the Loan Officer use in the marketing of the	
MFI? [This topic links to the Checklist "Individual Loan	
Analysis" in the Checklists Book]	
Loan application: How is the actual loan application process	
started? Who fills out the form? How are documents	
requested and verified? You want to understand who takes	
the lead in this process. You can assume that the more	
action is requested from clients in this process, the more	
responsible he will be.	
Loan application form: How useful are existing loan	
application forms in the lending process? Are they structured	
in a way to lead the Loan Officer through the analysis? How	
useful is the collected information? Is there sufficient space	
for comments? How detailed is the requested data? How	
easily can the Loan Officer defer to the default option	
"others" or "not available"?	
Loan application forms are the main tool for Loan Officers.	
They are used as a guide through the application process.	
However they are also frequently designed with a focus on	
the MIS system (data oriented).	
Credit analysis 1: How is the quantitative credit analysis	
conducted? What information is requested and verified?	
What criteria are used to approve a client? How is the loan	
amount defined? The loan amount is calculated occasionally	
based on "affordability" rather than on the financial need.	
Credit Analysis 2: How is the qualitative credit analysis	
conducted? How is the information verified? What other	
sources are used? For example, are neighbors, clients,	
suppliers interviewed? Is information requested from local	
authorities or the police? The availability of such information	
1	

depends also on regional specifics.	
External Information: What external information is provided by the MFI either through documents or through the MIS system? How well does the MFI use available information regarding similar borrowers?	
Credit Decision: How are loans approved? What decision authorities are applicable? Are there Credit Committees in place? How do Credit Committees operate? Are there real discussions in the Credit Committee or is this only another information verification level? How are loans presented to the Credit Committee? How many people are in the Credit Committees? How is the decision tracked? Does the Credit Committee only approve fully or can they approve with preconditions?	
Data management: how is the information about loans tracked? Who is entering the information into the MIS system and at what stage? The ideal MIS tracks a loan from the start of the application process. However there are MIS systems that start tracking only after the disbursements!	
Between approval and disbursement: how are the loans tracked after the credit approval? How is the information verified and how is fraud related to poor documentation prevented?	
Tracking after the disbursement: How is the loan tracked after the disbursement? Who is responsible for updating qualitative and quantitative information? Is there a monitoring of the Credit Exposure after disbursement? How frequently do loan officers stay in contact with the borrower after the loan has been disbursed? Is there anybody else who has frequent contact with the borrower?	
Success rate: find out how many loans get declined in the process. How many loans are presented for analysis and then declined? How many loans are declined by the approval authority? Are such unsuccessful loan applications tracked?	
Renewal: find out the process around renewal of loans. How much information can be accessed in the systems? How easy is the renewal process? How automated is the loan-renewal? Are there automatic increases of loan amounts? The key of the analysis around loan renewals is to differentiate between processes that can and should be simplified and automated and processes that should not be automated. The Loan Officer is still requested to make a thorough lending analysis. The fact that the borrower has repaid the last loan in line with expectations is helpful but not the only requirement for the loan extension.	
When looking in detail, analyze to what degree the following sources of error are influencing the disbursement process:	
- Compromise of credit principles	

 Extension of credit on unsound basis to directors or shareholders Incomplete credit information, ignorance of warning signals, dependence on verbal information Timid dealing with clients with dominating personalities, connections, friendships, or personal conflicts Staff is influenced by inadequate salary incentives Lack of adequate supervision Optimistic interpretation of known weaknesses No adequate supervision of old and familiar borrowers Loans for speculative reasons Technical incompetence 	
Explain the purpose and enforceability of the collateral. Frequently collateral is used as a factor to create discipline but it isn't really enforceable in case of a default or the administrative efforts around the realization of collateral are prohibitive!	

Checklist - Single Name Monitoring Process

Comment	Observation
Are credit risk policies and guidelines dealing with the process of single name monitoring?	
Describe the process of monitoring of single name credit risk. And how frequently such a loan review takes place.	
Who are the people involved in the monitoring process and how is the work split among the various teams? Specify the respective people and explain the respective responsibilities.	
Is every loan reviewed or are some selected according to specific criteria? Potential selection criteria could be: defaulted versus non-defaulted loans, specific products, specific regions, and specific collateral.	
Does the monitoring process rely on specific early warning signals? Which signals are used? Are those signals in line with the early warning signals identified in the early warning system for the MFI?	
If the MFI applies a scoring or rating technology in the lending process, are those results updated in the monitoring process? If so, what are the consequences if deterioration in the credit quality is discovered?	
What Actions are taken when the monitoring of individual loans discovers problems and issues?	
Is there a Watch List for problematic loans? Describe the functionality of the Watch List. What are the requirements for loans to be put on Watch List? Does the Watch List differentiate between the severities of situations?	
Are there specific review criteria for certain loan categories (e.g. reprogrammed loans, weaker credit score/rating) applied? Please define.	

Checklist - Monitoring of the Loan Portfolio

Comment	Observation
Are there credit risk policies and guidelines dealing with the process of Loan Portfolio Monitoring?	
Describe the process of monitoring of Loan Portfolio Monitoring & how frequently such a portfolio review takes place.	
Who are the people involved in the monitoring process and how is the work split among the various teams? Specify the respective people and explain their responsibilities.	
Is Stress Test Technology used when analyzing the Loan Portfolio? If so, explain the background of the Stress Tests. Who conducts the Stress Tests and how often?	
What actions are taken when the monitoring of Loan Portfolio discovers problems and issues? Are there Limit systems in place? If so, explain the limit criteria (e.g. by product, region, industry, etc).	
If the MFI applies a scoring or rating technology in the lending process, are those results updated in the monitoring process? If so, what are the consequences if deterioration in the credit quality is discovered?	

Checklist - Handling of Non-Performing Loans

Comment	Observation
How are Non-Performing Loans defined? What is the legal	
requirement regarding the definition of Non-Performing	
Loans? This topic is also covered in the area of data analysis.	
, , , , , , , , , , , , , , , , , , , ,	
How are Non-Performing Loans handled? Is there an In-	
house process or is it outsourced? Is there a specific	
department managing the Non-Performing Loans?	
What is the metric used for delinquent loans? Examples	
could be:	
 payments on time or on-time collection rates 	
 current payments collected plus late payments 	
collected plus pre-payments collected	
- collection rates on restructured loans	
 vintage analysis 	
Understand the detailed process flow. Who is responsible for	
what, in the process of managing Non-Performing Loans? Try	
to get an impression about how the former process is	
executed in reality.	
How is the accounting for Non-Performing Loans? At what	
stage is the Non-Performing Loans categorized as such? Who	
handles the change in accounting?	
Lather collection was seen for New Porterwise Land	
Is the collection process for Non-Performing Loans	
independent? If there are independent employees executing	
the collection process, are they subject to a specific code of conduct? The same question arises in case processes are	
outsourced. How is the integrity of the process insured even	
if it is outsourced? Are there specific trainings offered?	
The is outsourced. The there specime trumings offered.	
If the collection process is outsourced, there are several	
questions:	
- what services exactly are outsourced?	
 What is the fee structure of outsourced services? 	
- How is the performance of the outsourced work	
verified?	
 Are there any challenges related to dealing with 	
the outsourced processes?	
Does the outsourcing contract have clauses related to	
unacceptable practices? Such unacceptable practices could	
include for example:	
- contact borrower with unreasonable frequency	
- contact borrowed during unreasonable hours	
- use physical violence and threatening language	
- unduly reveal credit information to third parties	
- discrimination	
Describe what happens to leave that are one Day overdue	
Describe what happens to loans that are one Day overdue	
until recovery or write-off. Describe the various stages of the collection process and evaluate how strict the institution	
handles nonperforming borrowers.	
nanaies nonpenorning portowers.	

Evaluate how comfortable the people are that are involved in the collection process. A certain amount of discomfort and fear about the legitimate reasons for collecting in all harshness can cause serious problems for the efficiency of the collection process.	
Explain the process around restructuring/refinancing/reprogramming of loans. Who are the responsible people for making the related decisions? Are their time limits related to the restructuring? Are there any penalty interest rates?	
What are the tools/options the MFI can offer for clients who would like to restructure/refinance/reprogram?	
Explain the accounting process around reprogramming. Are reprogrammed loans specifically categorized or are they treated just as regular loans?	
How are reprogrammed loans shown in statistics about credit quality?	
What is the level of success for reprogrammed loans?	
What are the improvements that could be implemented to the restructuring process according to the employees involved in the process?	
Explain the write-off policies.	
Are their audit processes in place related to the restructuring and reprogramming of loans? In case there are, please elaborate on the audit results.	
Based on the Analyst's estimates how tight is the restructuring/reprogramming process organized? Is there room for obvious fraud?	
How is the process flow from the declaration that a loan is non-performing to the booking of an appropriate provision?	
Get opinions from the loan officers about the efficiency of restructuring/reprogramming. Also, collect information about how the restructuring/reprogramming contest who are the MFI's.	
What is the success rate regarding restructured loans? What are the provisions built against restructured loans?	
Is there a feedback process established related to the experience collected in reprogramming? Can't loan officers learned from the restructuring process?	
Is there an information pool established where information about the reasons for the faults is collected? In this way loan officers could continue to learn and improve their editing skills.	

What are the major problems related to the process of restructuring/reprogramming? Problems could be: - the staff is not adequately trained or experienced - there are too many cases, therefore the staff is overloaded - there's no system in place to prioritize specific actions -	
Provide statistical data about the success of restructuring loans. What is the percentage of loans that repay in full without issues arising after the restructuring has taken place?	
Is there a specific watch list for restructured loans?	
What happens to the reserves of restructured loans?	

Human Resource Aspects	
Comment	Observation
Who are the people involved in the local collection? Are those colleagues also involved in other processes or are they doing loan collection as a full-time job?	
What is the overall level of skills and experience of the staff involved in loan collection? (Length of stay with the MFI, experience of working in the MFI sector, education, training)	
How many collection cases are there per staff?	
Is there any specialization of staff selected for loan collection?	
What are the incentives given staff involved in the collection process? Examples could include: collection targets, commissions, or other	
How are the incentives to increase lending balanced with the incentives to improve portfolio quality and loan recovery rates.	

Technology Aspects	
Comment	Observation
How can the Individual Loan Files be accessed? Explain the software used to track loan information	
Is there a centralized helpline for customers, like a call center? If that's the case explain the functionality and also explain the amount/kind of information received there.	
Is the MIS able to track performance of restructured loans separately?	

Checklist - High Level Risk Management Process

Risk Management Committee	
Comment	Observation
Analyze the agenda of the ALCO.	
If possible participate in the one of the Risk Committee meetings. Analyze how the meetings are conducted. How strong is the leader of the meeting? Are the other participants contributing or just listening? Is there an open discussion about the risk positions?	
How is the situation in the market and among the competitors discussed?	
Can the Analysts conclude from the discussion that the participants of the risk committee have sufficiently detailed knowledge?	
Are special movements in certain risk categories specifically discussed and explained?	
Analyze the minutes of the ALCO. How clearly are they written? How clearly are action items and responsible persons set? How is the follow up of such action items organized?	
Analyze the Minutes of the Board Risk Committee and other Risk Committees.	

Interview Guide - Loan Officer

Criteria	Comment
	Comment
Does the Loan Officer claim familiarity with Policies and Guidelines?	
Guidelines	
V : (1	
Verify how knowledgeable the Loan Officer is about the	
Credit Policies. When did he read them last? Does he think	
that they add value? Does he have suggestions for	
improvements?	
How qualified are loan officers to evaluate the true	
repayment capacity of a borrower?	
MFIs generally treat collateral more as a psychological tool	
than as a secondary source of loan payback. How capable is	
the Loan Officer to use collateral in an efficient manner?	
How does the actual collateral management compare to the	
policies?	
policies:	
Is the lean officer familiar with the proceedings of the Condition	
Is the loan officer familiar with the procedure of the Credit	
Bureau?	
Is the loan officer familiar with land title?	
Does the loan officer adequately review loan renewals?	
How is multiple borrowing by clients discovered?	
How is delinquency treated? How are clients classified and	
when? Are the rules followed?	
How strictly are guidelines followed regarding loan	
disbursements? What are the problems arising from this	
procedure?	
What else is the loan officer doing to monitor the credit	
quality of his borrowers?	
quanty of this borrowers.	
To what degree is the loan officer subject to the following	
sources of risk:	
- Compromise of credit principles	
- Extension of credit on unsound basis to directors or	
shareholders	
- Incomplete credit information, ignorance of warning	
signals, dependence on verbal information	
- Lack of forceful action when dealing with clients with	
dominating personalities, connections, friendships, or	
personal conflicts	
- Influenced by inadequate salary incentives	
- Lack of adequate supervision	
- Optimistic interpretation of known weaknesses	
- No adequate supervision of old and familiar borrowers	
- Loans for speculative reasons	
- Technical incompetence	
· · · · · · · · · · · · · · · · · · ·	<u>l</u>

To what degree is the loan officer comfortable with his level of knowledge and his training? Does he feel adequately prepared for the risks he is analyzing and the risks he is taking?	
Are the Loan Officers motivated by the existing incentive systems? Or are they creating uncomfortable pressure on the loan officer?
